Objective

I am an aspiring technology professional with a strong passion for innovation, problem-solving, and digital transformation. I am a BCom Information Systems graduate at North-West university with a strong foundation in both business processes and technology. Proven ability to design and manage complex databases and develop secure web applications. I strive to apply my technical, analytical and problem-solving skills to develop intelligent, data-driven solutions that enhance efficiency and optimize business processes, thus delivering value in innovative and team-driven environments. My goal is to grow within a forward-thinking organization where I can contribute to impactful projects while continuously expanding my professional and technical expertise.

Educational History

- NorthWest University (2025)
  BCom in Information Systems

  Relevant Subjects: Statics, Database, Object-Oriented Language, Computer Organization and Architecture, Electronic Business, Introduction to Networks, System Design and Analysis, Web programming, Information Systems Security, Project Management for Information Systems, Emerging Business Technologies, Business Intelligence, Management Information Systems

- Relebogile Secondary School (2018)

Projects

- North-West University Registration System
  Third Year Project (2023)
  Role: Database development and management

  Acted as the lead for database development, ensuring data integrity and contributing to comprehensive systems documentation. Designed and implemented the databases to support the NWU online application and registration systems. This system is designed to **enhance institutional data integrity** by automating the enforcement of academic prerequisites within the North-West University registration framework.

- University Cafeteria Food Ordering System
  Final Year Project (2024)
  Role: Database development and management

  Designed and implemented relational databases to support online ordering and on-campus delivery for university stakeholders and contributing to the projects comprehensive system documentation. The system is designed to exclusively serve university stakeholders, enabling them to order food online and receive deliveries on campus. This project aims to enhance the efficiency of cafeteria services and improve satisfaction among students and staff.

- Academic research: The Disruptiveness of AI in Higher Education
  Final Year Project (2024)
  Role: Co-Author

  Abstract: The speedy introduction of Artificial Intelligence (AI) into higher education is creating transformative efficiencies and disrupting existing academic positions and creative professional practices. This research explores the impacts of AI as an enabler, a disruptor, and its ramifications for academic work and intellectual creativity using a rapid literature review (RLR) methodology. The study contributes to the ongoing debate on the disruptive nature of AI on academic jobs through an analysis of the impacts on academic roles and tasks and creative autonomy.
